

“The library connects us with the insight and knowledge, painfully extracted from Nature, of the greatest minds that ever were, with the best teachers, drawn from the entire planet and from all our history, to instruct us without tiring and to inspire us to make our own contribution to the collective knowledge of the human species.”—Carl Sagan Cosmos

College library known as Knowledge Centre, built in the memory of Lala Lajpat Rai, can legitimately be proud to have shaped the carriers of thousands of young men and women. It came into existence in 1918 and is the store house of knowledge. Under the able and visionary stewardship of Principals and Librarians, it has progressed to be one of the richest, two storied, spacious, digital, automated and multimedia knowledge centre of this region.

Our library is the only library in the region to provide web based OPAC.
